

Solutions

1a.

A list of all sampling units / a list of all members of the target population	M1
---	-----------

1b.

Any population whose members cannot be listed	M1
---	-----------

1c.

Quota sampling / cluster sampling	M1
-----------------------------------	-----------

2a.

Stratified or quota or Opinion will probably depend on age / sex	M1
--	-----------

If stratified: Sampling frame easily available/ Population small enough so that it will not be too time-consuming	M1
---	-----------

If quota: information not that important and this is easy/ results should be fairly accurate	M1
--	-----------

2b.

A method not requiring a sampling frame	M1
Cluster, quota or suitable description	M1

2c.

Simple random / systematic	M1
Procedure is easy in this case and sampling frame available	M1
